# KaVo Primus 1058 Life

 Made in  
Germany

## KaVo Primus 1058 Life

Features	Use
Modern, streamlined patient chair, maximum patient weight of 185 kg	For excellent ergonomics and high treatment comfort
Integrated Trendelenburg movement	
Seamlessly adjustable from 350 mm to 830 mm	
Dentist's unit with integrated display and direct buttons and five integrated instrument holders (MEMOspeed optional)	Efficient workflow
Fulfills all DVGW and RKI requirements	Modern hygiene: simple and secure

# KaVo ESTETICA E30

## KaVo ESTETICA E30

Feature	Benefit
Streamlined patient chair design, for max. patient weight up to 180 kg, integrated Trendelenburg movement, height adjustable from 350 mm to 830 mm	Safe and comfortable patient positioning on the patient chair allows to work relaxed and efficiently
Dentist element with integrated display and direct button operating concept, as well as KaVo multifunction foot control	Clear and simple operating concept simplify the function control and provide convenient workflow as information is available at a single glance
Five instrument modules, individually configurable Optional Endo torque control function available	Clever KaVo technologies and integrated functions ensure cost-efficient operation
Fully ambidextrous version (switching in less than 2 minutes) or installation for left-/right-handed dentist available	Equally well suited to working from both sides

 Made in  
Germany

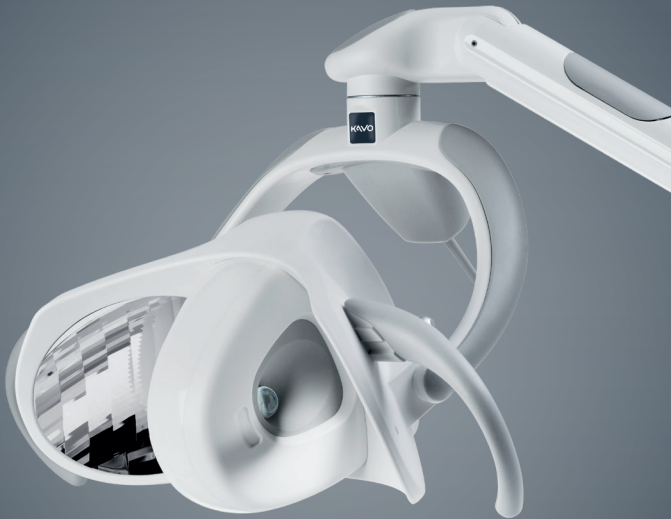

## KaVoLUX 540 LED Treatment lights

### KaVoLUX 540 LED

Features	Use
Natural white light with up to 40,000 LUX with a CRI of > 93% (daylight quality)	Highest quality combined with outstanding colour reproduction for optimal viewing and precise alignment of tooth and composite colours
Uniform, precisely limited and shadow-free light field with individually adjustable light colours	Optimised viewing, distinct illumination and higher contrast in the entire mouth area for better recognition of details, while avoiding eye fatigue
Innovative COMPOsave Mode with brightness of up to 15,000 Lux	Photocurable materials can be comfortably processed, always with optimal viewing, by filtering the blue parts of the light
Lockable 3D hinge and contact-free operation via sensors	Outstanding illumination of the entire field of treatment, irrespective of the position of the practitioner and the patient Simple and hygienic solution for the operation
Removable, sterilisable handles available as an option	Best hygiene solution

# KaVo MAIA LED treatment lights

## KaVo MAIA LED

Features	Use
Continuously adjustable luminosity to a maximum of 35,000 LUX	For precise, concentrated and fatigue-free work
Daylight quality (5,000 K) lighting	Maximally true-to-life recognition of colours and structures in the patient's mouth
Silent LED technology	Long lifespan and low energy consumption Reduced noise emissions during treatment
Removable handles can be sterilised	Simple hygiene solution

# KaVo PHYSIO Work chair

## KaVo PHYSIO Evo/Evo F/One

Features	Use
<p>AGR seal of approval <b>(PHYSIO Evo/Evo F)</b></p>	<p>Enables a natural, healthy posture while sitting</p> <p>Distinguished with the seal of approval of the AGR ("Campaign for Healthier Backs")</p> <p>An independent, multidisciplinary Expert Commission bases this award on strict ergonomics and health test criteria</p>
<p>Independent sitting area and backrest setting functions <b>(PHYSIO Evo/Evo F)</b></p>	<p>Individual adjustment of the sitting area and the backrest in response to anatomical requirements and personal treatment style</p> <p>Obviously, smooth workflows and the greatest possible sitting comfort are possible for each treatment</p>
<p>Inclination of the backrest and the sitting area at a fixed, ergonomic angle <b>(PHYSIO One only)</b></p>	<p>Support of the anatomically natural posture by means of a comfortable and correct sitting position</p> <p>Basis for treating, over the long term, in a relaxed and back-friendly manner</p>
<p>Foot-controlled height adjustment <b>(PHYSIO Evo F)</b></p>	<p>Special hygienic foot operation</p> <p>Avoidance of cross-contamination</p>

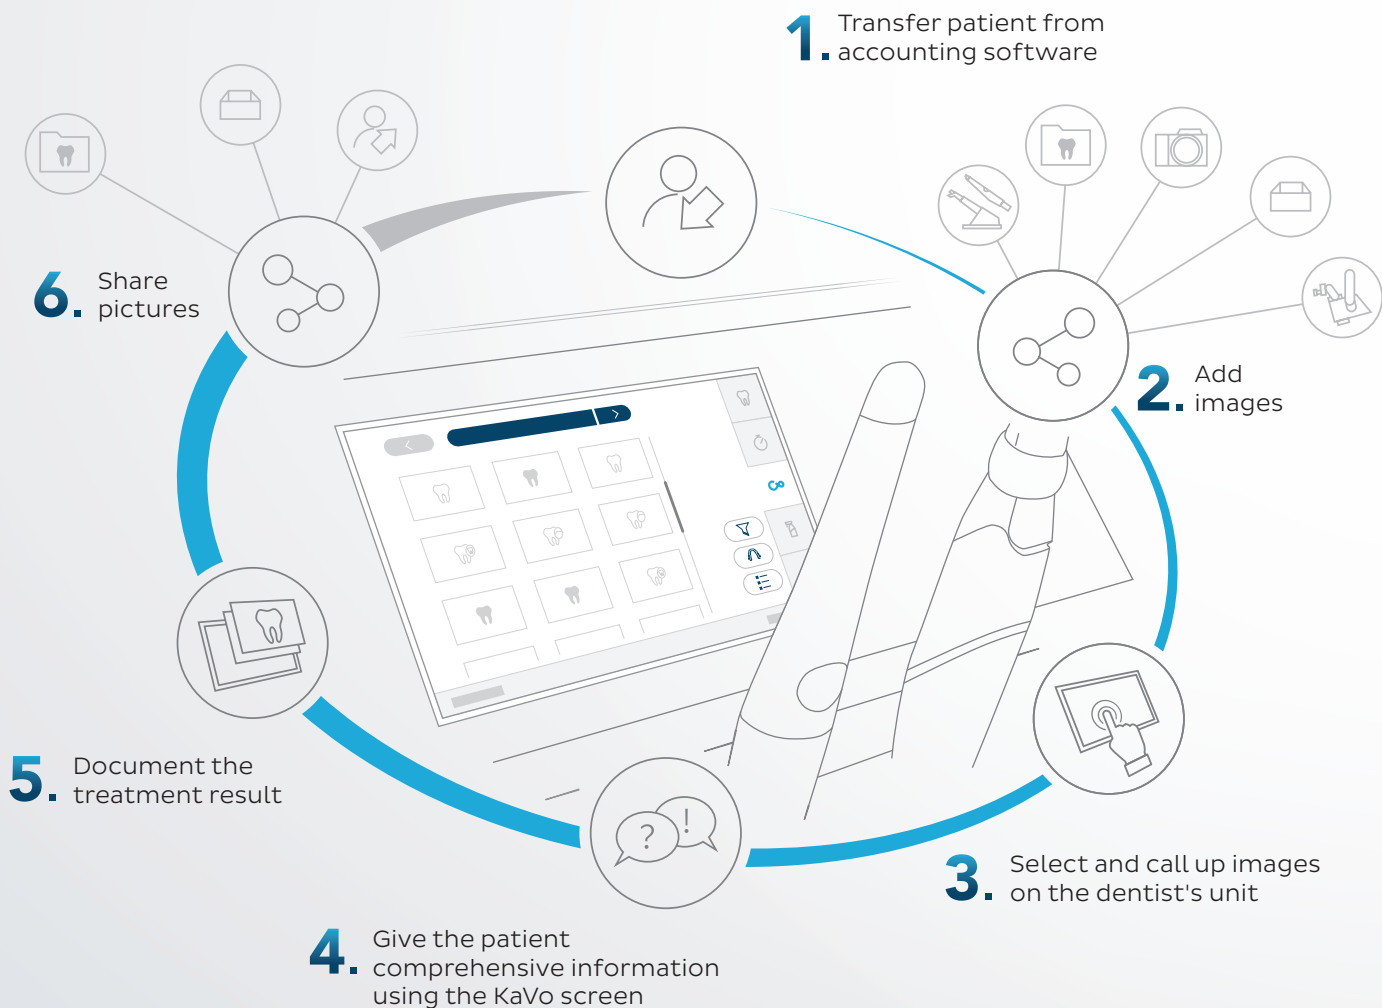

## Patient communication

Features	Use
<b>CONEXIOcom:</b> Easy switching from treatment mode into the world of digital pictures and back with just one click on the dentist's unit	Simplifies the workflow without a mouse, a keyboard, or another PC <b>K</b>
Selectable components: <b>Screen HD 22" HD/</b> <b>Screen One 19" HD ready</b>	High resolution picture quality, persuasive contrast values and brilliant colour reproduction, optimally matched to all the functions of imaging devices  Wipe-disinfectable protective glass screen for maximal hygiene safety
Optional <b>DIAGNOcam Vision Full HD*</b>	3-in-1 shot for comprehensive validity with one click in < 1 second  Intraoral camera for initial visual diagnosis  Transillumination technology for in-depth insights  Fluorescence images for the final check before completion of treatment
Optional Intraoral camera <b>ERGOcam One</b>	Easy to use camera with high depth of field and outstanding colour reproduction

\* **✓** Further information is available in the **KaVo Instruments Pocket Guide on page 43**

**K** Exclusively from KaVo

# CONEXIO connects what belongs together.

# KaVo CONNECTbase

## KaVo CONNECTlink

With the new software module CONNECTlink your patient-management-software can be connected with your KaVo treatment unit to enable a simple and fast transfer of patient data and clinical images.

## KaVo CONNECTbase\*

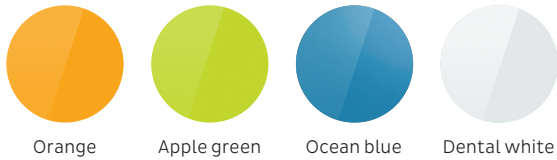

Features	Use
Operation directly from the treatment unit	Simple and efficient patient communication
Can be operated using the touch display or the foot pedal	Seamless treatment workflow
KaVo cameras ready for plug and play on the treatment unit	No additional software installation required Simple and efficient diagnostic tools on the treatment unit
Two other HDMI sources can be connected to the treatment unit and accessed via the touch display foot pedal	Efficient treatment and patient communication
Integrated 18 GB hard drive for treatment data and media	Images and treatment data can be saved immediately
Data can be imported or exported via a USB flash drive or cable	Access clinical images and continue to use the treatment data, e.g. in practice management software Import individual data/media
KaVo Screen HD – the perfect choice in Full HD • Full HD True Flatscreen • Aspect ratio: 16:9 • Screen diagonal: 22 inches • Two digital inputs for microscope and PC	High-resolution image quality, impressive contrast values and brilliant colour reproduction Optimally tuned for functionality offered by imaging devices, e.g. cameras or microscopes

\* available for both the KaVo ESTETICA E70/E80 Vision and the KaVo uniQa

The new CONNECTlink software can be ordered as a separate module to your existing CONNECTbase patient management system. For the use of CONNECTlink, CONNECTbase and the corresponding CONNECTlink for your KaVo treatment unit are required.
